

Earthing connectors Sicame CMT 113

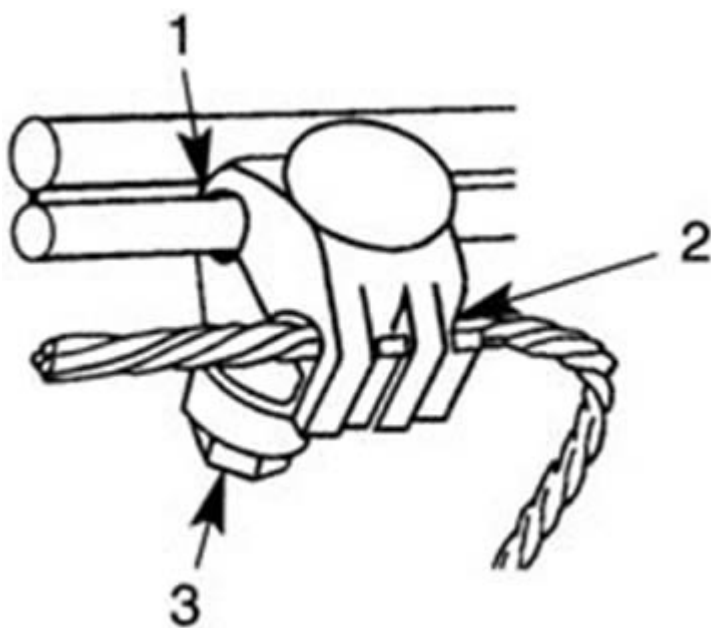

On demand

Manufacturer: Sicame 

type: Tools

Earthing connectors Sicame CMT 113 are designed for quick and safe grounding of cables with insulated bearing steel wire. The connector is made of high-strength polymer stabilized to UV rays, corrosion-resistant metal alloy and shielded steel that guarantees 100% grounding and durability.

Installation Instruction - place the branch wire into hole (2). - with the clamp (1) top cover the cable supporting member but not strip its insulation. - tighten the connector's bolt with the help of a hex-nut wrench (13 mm) till breaking head (3) splits. **ATTENTION:** only a hex-nut wrench shall be used!!!
