

Smit CONAX CAM

Производитель: [Smit](#)

Вес: 0.057 кг

Кодировка: [Conax](#)

Описание

Лицензионный CAM — модуль условного доступа (CA-модуль) для приема каналов в кодировке Conax под ресиверы с Common Interface. Стандарт PCMCIA.

Adopting ASIC chip with proprietary intellectual property right:

- Embedded 32-bit CPU (ARM7TDMI)
- Adopting advanced 0.18-micron technology
- Advanced language development environment
- Supporting subsequent development of value-added services

Descrambling: Supporting common descrambling algorithm of Europe

DVB-CI interface: Compatible with DVB-CI / PCMCIA

Smart Card interface: ISO7816

Характеристики

Dimensions: PCMCIA type II

Interface protocols of the host: In full compliance with DVB-CI Profile 1 protocol

External interface of IC card: Build-in SmartCard reader, in compliance with ISO7816 protocol

Operating system: Embedded Linux system with proprietary intellectual property rights

Internal descrambler: Integrated universal DVB descrambler

MPEG DEMUX: Multi-channel SECTION and PID filter configurable through software

Enclosure structure: Latest compact structure and design for assembly
